

SWEETVENT

Vent Stack Odor Control Module

CALGON CARBON CORPORATION

Description

SweetVent is an odor control product designed to control vent stack odor emissions. These emissions can be from a range of sources, such as municipal and industrial wastewater facilities, restaurants, and various commercial and industrial operations. SweetVent is a simple device that attaches to the end of a vent stack. SweetVents come in two varieties: slip-on or flanged vent stack connection. Both varieties are available in a range of sizes. All SweetVents contain 10 pounds of Calgon Carbon's Centaur® HSV catalytic activated carbon.

Operation

The SweetVent utilizes the positive pressure generated inside the vent line to push the contaminated air up through the unit. The odorous compounds are adsorbed by the Centaur® HSV carbon allowing clean air to pass through the end of the SweetVent into the atmosphere. The pressure surges within the vent line are sufficient to overcome the pressure drop across the carbon bed. When odor breakthrough occurs, only the carbon needs to be replaced. Refill bags of Centaur® HSV carbon are available in 100 pound drums containing five 20 pound bags.

Features

Passive system	System has no moving parts and requires no water or electricity.
All-plastic construction	Reliable, non-corrosive construction ensures years of service.
Slip-on or flanged connection	Flexible connection options – connects to plain end or flanged vent stacks.
Available in four standard sizes	Standard SweetVents are available for stacks from 4" to 10" in diameter.
Uses activated carbon	Stable operation able to treat uneven loadings and spikes without breakthroughs.

Specifications

Slip-On Models	4", 6", 8", 10" diameters*
Flanged Models	4", 6", 8", 10" diameters*
Material of Construction:	Polyvinyl chloride (PVC), Polyethylene (PE)
Carbon Capacity:	10 lbs.
Carbon Type:	Centaur® HSV

*Larger diameters available on a custom basis.

Commercial Information

Shipping Points	Pittsburgh, PA, USA
Packaging	Unit packed in cardboard box – total weight: 20 lbs.
Replacement Carbon	Available in 20 lb. plastic bags packaged in lots of 5 bags per drum
Delivery	2 to 3 weeks (made to order)

Benefits

4" Slip-on SweetVent

SWEETVENT

Vent Stack Odor Control Module

CALGON CARBON CORPORATION

Safety Message

Wet activated carbon preferentially removes oxygen from air. In closed or partially closed containers and vessels, oxygen depletion may reach hazardous levels. If workers are to enter a vessel containing carbon, appropriate sampling and work procedures for potentially low oxygen spaces should be followed, including all applicable Federal and State requirements.

Limitations of Liability

The Supplier's liability and the Purchaser's exclusive remedy for any cause of action arising out of this transaction, including, but not limited to, breach of warranty, negligence and/or indemnification, is expressly limited to a maximum of the purchase price of spare parts or equipment sold hereunder. All claims of whatsoever nature shall be deemed waived unless made in writing within forty-five (45) days of the occurrence giving rise to the claim. In no event shall the Supplier, for any reason or pursuant to any provision of the warranty, be liable for incidental or consequential damages or damages in excess of the purchase price, nor shall the Supplier be liable for loss of profits or fines imposed by governmental agencies.
